EDUCATION

Vellore Institute of Technology

Bhopal, Madhya Pradesh

Bachelor of Technology in Computer Science and Engineering (AI & ML) — CGPA: 8.48

GHSS Chayoth Nileshtar

Kerala

Higher Secondary Education – Science Stream — Percentage: 94.75%

TECHNICAL SKILLS

Languages: Python, SQL

Machine Learning: Supervised Learning, Classification, Regression, CNN, Model Evaluation, Feature Engineering, Data Preprocessing, LLMs, Prompt Engineering, Rag(basics)

AI-Assisted Development: AI Coding Assistants, LLM-Assisted Coding, Prompt Based Development, Rapid Prototyping, AI Assisted Debugging **Libraries:** NumPy, Pandas, Scikit-learn,

Databases: SQL, Firebase, Supabase, PostgreSQL **Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Streamlit, FastAPI, AWS,

PROJECTS

AI Image Detection System | Python, PyTorch, FastAPI [GitHub](#)

- Built a deep learning model to classify images as real or AI-generated using a convolutional neural network.
- Preprocessed real and AI-generated images and trained the model for binary image classification.
- Developed a FastAPI interface that accepts an image and returns the model prediction.

AgroVedha: Smart Agriculture Monitoring System | Python, ESP32, Firebase, Gemini API [GitHub](#)

- Worked on collecting and preparing agricultural data by combining sensor readings with weather data to create a project-specific dataset.
- Coordinated the integration of the team's ML and Gemini API-based AI modules, including the chatbot and AI explanation features, into the application.
- Integrated the team's frontend and backend components and connected the different modules into a single working application.
- Implemented the transition from static CSV-based sensor data to live ESP32 readings through Firebase for real-time demonstrations.

Credit Card Fraud Detection System | Python, Pandas, Scikit-learn, Streamlit [GitHub](#)

- Built a machine learning classification model to identify potentially fraudulent credit card transactions from tabular data.
- Compared Logistic Regression and Random Forest models using precision, recall, F1-score, and confusion matrix.
- Handled class imbalance using SMOTE and developed a Streamlit interface to demonstrate transaction predictions.

CERTIFICATIONS

Applied Machine Learning in Python – University of Michigan

NPTEL Cloud Computing – IIT Kharagpur — Score: 75%

NPTEL Introduction to IoT – IIT Kharagpur — Score: 84%

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

Cricket: Represented Kasaragod District, Kerala in U14 cricket as an opening batsman.

Flipkart GRiD: Participated in the Flipkart GRiD hackathon.

Malayalam Club: Served on the Food Committee in organizing and managing food arrangements for Malayalam Club events.
